

A male doctor with dark hair and a mustache, wearing a white lab coat over a light blue shirt and a dark tie, is using a stethoscope to examine a female patient's chest. The patient is an older woman with short brown hair, wearing a light green top. They are in a clinical setting with a white wall in the background. On the wall, there is a large anatomical chart of the human torso showing internal organs, and several smaller informational posters. The doctor is looking down at the patient's chest, and the patient is looking up at him with a neutral expression.

A combination of poorly informed governmental decisions and bureaucratic bungling has created a medical emergency across the state for thousands of dual-eligible Texans and the physicians who care for them.

Please ask Texas legislators and the Legislative Budget Board to reverse the cap on Medicaid-allowable payments for dual-eligible patients and ensure physicians can continue to see these patients.

Please print your name and address.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
