

# Core Set: Measure 14

## Objective

Capability to exchange key clinical information (for example, problem list, medication list, allergies and diagnostic test results), among providers of care and patient authorized entities, electronically

## Measure

Perform at least one test of certified EHR technology's capacity to electronically exchange key clinical information

*NextGen Products to Help Demonstrate Meaningful Use*  
**NextGen Ambulatory EHR 5.6 SP1**  
**NextGen Medical Summary Utility**  
**NextGen HIE Connect (recommended)**

With NextGen's Medical Summary Utility, a provider has several different ways to export/import patient data to/from a variety of sources, enabling security and privacy of patients' medical information.

Providers can generate a Continuity of Care Document (CCD) or Continuity of Care Record (CCR) to send electronically to other providers of care and patient authorized entities through NextGen's Medical Summary Utility. Providers can also import both CCD and CCR through the Medical Summary Utility.

Exchange of key clinical information can be even easier with the help of NextGen's Health Information Exchange (HIE). NextGen's HIE Connect allows providers to electronically share and retrieve clinical data within their regions, communities, and hospital systems. Complete charts with a patients comprehensive medical history are created within the HIE and these records are then immediately available online. Providers never have to email or send a jump drive with medical history again.

**Continuity of Care Record**

Date Created: Tue Sep 14, 2010 at 08:42 PM UTC  
 From: NEXGEN Medical Practice (Horsham) (Generating Entity)  
 Barry Anderson (PCP)  
 To: Catherine Act (Patient)  
 Purpose:

Name	Date of Birth	Gender	Identification Numbers	Address / Phone
Catherine Act	Apr 19, 1936	Female	NextGen Person ID: 966d44e-d96a-4908-9d1a-65241b3893bb MRN: 966d44e-d96a-4908-9d1a-65241b3893bb	434 Austin Blvd Chicago, IL 60635 Home Phone: (312)-234-2343
