Medication List

Objective – Maintain an active medication list.

Measure – More than 80% of all unique patients seen by the EP have at least one entry (or an indication that the patient is not currently prescribed any medication) recorded as structured data.

‘How To’ in PrimeSUITE 2011 - Medications can be prescribed, refilled, adjusted, or discontinued from either the Medication list on the Facesheet, or from the Plan section of a note. For a new patient/patient whose Facesheet has not yet been set up, opening the Medication list will allow you to select ‘None Listed’, ‘No Known’, ‘No Relevant’, or ‘No Current’ if applicable.
