

## Electronic Copy of Health Information

**Objective** – Provide patients with an electronic copy of their health information (including diagnostics test results, problem list, medication lists, and medication allergies) upon request.

**Measure** – **More than 50%** of all patients of the EP who request an electronic copy of their health information are provided it within **3 business days**.

**‘How To’ in PrimeSUITE 2011** – To meet this Meaningful Use objective, each time a patient requests their Health Record in *electronic* form, a Task should be created using the new task type “Electronic Record Request”. This task will be used to track the request for the measure. Once the task is created, navigate to **System > Document Import** and select the Data Submission option from the Chart Action Bar. Here you can export an electronic copy of the record for the patient. Once this has been done, return to the Task and mark as complete.
