

Patient Reminder

Objective – Send reminders to patients per patient preference (preferred communication from the Patient Registration Information page) for preventative/follow up care. To access the Patient Registration Information page, navigate to **Registration > Information**.

Measure – More **than 20% of all unique patients 65 years or older or 5 years or younger** were sent an appropriate reminder during the EHR reporting period.

'How To' in PrimeSUITE 2011 –Change the status of these Recalls to indicate that the patient has been notified by their preferred method of communication. The purpose is to be able to report how many patients have a recall and how many were actually notified of the recall.
