Syndromic Surveillance

**Objective** – Capability to submit electronic syndromic surveillance data to public health agencies and actual submission in accordance with applicable law and practice.

**Measure** – **Performed at least one test of PrimeSUITE 2011**’s capacity to provide electronic syndromic surveillance data to public health agencies and follow-up submission if the test is successful (unless none of the public health agencies to which an EP submits such information have the capacity to receive the information electronically.)

‘How-To’ in **PrimeSUITE 2011** – If the Public Health agency in the EP’s area can receive HL-7 Syndromic Surveillance messages and **PrimeEXCHANGE** has an interface to the agency, when diagnosing a patient with illnesses related to specified syndromic surveillance programs (e.g. Novel H1N1 Influenza, smallpox, etc.) an HL-7 message can be automatically submitted.
