

### Core Objective 13

Provide clinical summaries for patient for each office visit. - **170.304(h)**

Clinical summaries provided to patients for more than 50% of all office visits within three business days

The Medical Summary (Visit Summary) is a customizable document that is available in real-time and is printable on demand. The Visit Summary can be generated from within the Progress Note or at the time of check-out from the Resource Schedule.

The Visit Summary contains a CCD view of the patient for enhanced continuity of care.

The Visit Summary is sent to the patient's secure account at the Patient Portal as a scheduled job if the practice uses the eCW Patient Portal and if the patient is web-enabled.
