DON'T MISS OUT ON ALL WE'LL DO TOGETHER IN 2020.

2020 isn't a legislative year in Texas, but TMA is still working hard for you and your practice. This year TMA will help legislators better understand and address:

- The uninsured rate in Texas
- Texas' behavioral health system
- Child trafficking prevention needs
- The effect of technology and "big data" on insurance
- Needed investments in early childhood intervention programs
- Hospital funding methods, including graduate medical education payments and trauma allocations to support rural and children's hospitals
- The adequacy of Medicaid payments for nursing facilities, quality incentive payment programs, and value-based payment models
- The effects of budgetary changes on state health programs

Your membership in TMA helps us influence public policies that directly affect you.
