**ASPR TRACIE**

<https://asprtracie.hhs.gov/>

Brought to you by HHS ASPR, the Technical Resources, Assistance Center, and Information Exchange (TRACIE) was created to meet the information and technical assistance needs of regional ASPR staff, healthcare coalitions, healthcare entities, healthcare providers, emergency managers, public health practitioners, and others working in disaster medicine, healthcare system preparedness, and public health emergency preparedness.

**CDC Hospital Legal Preparedness Info**

<https://www.cdc.gov/php/publications/topic/hospital.html>

**Crises and Emergency Risk Communication**

<https://emergency.cdc.gov/cerc/>

CDC's Crisis and Emergency Risk Communication (CERC) draws from lessons learned during past public health emergencies and research in the fields of public health, psychology, and emergency risk communication. CDC's CERC program provides trainings, tools, and resources to help health communicators, emergency responders, and leaders of organizations communicate effectively during emergencies.

**FEMA Training Online**

<https://training.fema.gov/is/crslist.aspx>

Online free courses provided by FEMA. For disaster response, most agencies require:  
IS 100, IS 200, IS 700, IS 800

**Hazard Vulnerability Analysis (Kaiser)**

<https://www.calhospitalprepare.org/hazard-vulnerability-analysis>

Downloadable tool for performing a formal hazard vulnerability analysis (includes instructions).

**Texas Disaster Medical System**

<http://www.tdms.org/>

The Texas Disaster Medical System (TDMS) was created as a support function designed to facilitate the planning and activation of Emergency Medical Resources in times of critical need. TDMS is financially supported by Texas' Department of State Health Services (DSHS) and receives conceptual guidance and recommendations from a steering committee of subject matter experts from many different aspects of emergency care from across Texas.
